SKILLS

AI & ML | • Databricks • Multimodal Systems • Random Forest • CNNs • RL • PPO • LLM
Deep Learning | • TensorFlow • PyTorch • Sklearn • Transformers • AutoGen
Data Science | • Python • SQL • Advanced Analytics • Databricks • PySpark
Cloud & DevOps | AWS • Model Deployment • Docker • CI/CD • RAG • MLOPS • Kubernetes
Research & Innovation | AI Strategy • Algorithm Optimization • Research
Software Development | • API Development • System Design
Soft Skills | Problem Solving • Adaptability • Analytical Thinking • Innovation

EXPERIENCE

[MLSE \(Maple Leaf Sports & Entertainment\)](#) | Senior Platform Engineer AI / MLOps | Aug 2024 - Present | Toronto, Canada

Databricks, Delta Lake, MLflow, PySpark, Lakehouse Monitoring, AWS (S3, Glue, IAM), Python, Docker, EKS, SageMaker

- Built and standardized Databricks + medallion pipelines to move use cases from POC to production faster; added data quality checks, lineage, and access controls to reduce breakage and rework.
- Post-game survey scoring: identified that spikes in negative comments often followed on-field/team performance rather than venue issues; introduced performance-aware weighting to improve the signal for actionable insights.
- Fan Pass pack recommendation: productionized a RandomForestClassifier with hyperparameter tuning recorded in MLflow, stabilized features via Feature Store, and delivered ranked game bundles per user.
- Primarily served models on Databricks (scheduled/batch and endpoints) for reliability and integrated monitoring/governance; used SageMaker endpoints when API latency requirements warranted.

[CURINOS](#) | Senior Machine Learning Engineer | Aug 2022 - June 2024 | Toronto, Canada

SQL, Python, Databricks, PySpark, Machine Learning, Reinforcement Learning, Sklearn

- Co-designed a Databricks-centric ML platform: ingestion via AWS Glue/Spark into Delta, feature computation & reuse via Feature Store, and promotion through MLflow registry with approver gates.
- Shipped marketing/email recommendation models aligned to business KPIs (deposits, CTR) partnered with marketing to define experiments and dashboards and to operationalize learnings.
- Implemented drift & performance monitoring (model metrics + business KPIs) and shadow testing prior to full promotion.

[PROFERO TECHNO](#) | Senior Software Engineer | Nov 2019 - Nov 2021 | Mumbai, India

Docker, Python, React, AWS, TerraForm, NodeJs, Flask, Django

- Led backend/API development and reliability improvements; drove +20% MoM CSAT through UX + stability fixes.
- Dockerized services and codified infra with Terraform; standardized logging and error budgets.

[DEVOMARK](#) | DevOps Engineer | Mar 2019 - Oct 2019 | Mumbai, India

AWS, EC2, RDS, CI/CD, Docker, TerraForm

- Built and maintained CI/CD workflows; migrated toward microservices to improve release cadence and scalability. Hardened repo/security practices and baseline cloud cost/perf hygiene for new product releases.

[MAQ Software](#) | Software Engineer I | Aug 2018 - Feb 2019 | Mumbai, India

SQL, PowerBI, Tableau, SSMS, HTML, CSS, Javascript

- Developed interactive dashboards for comprehensive data analysis, refined testing frameworks to enhance code standardization, architected automation tools to improve click-through rates, fortified web platform testing reducing glitches, and collaborated closely with QA to ensure high-quality web app launches.

EDUCATION

**Lakehead University -
Thunder Bay, Canada**

Master of Computer Science
May 2022 | Ontario, Canada
GPA: 3.74/4

**Vidyalankar Institute of Technology -
Mumbai, India**

Bachelor's in Information Technology
May 2018 | Maharashtra, India
GPA: 8.98/10

PUBLICATIONS

**Multi-Modal Instruction based
Reinforcement Learning using MoME
Transformer** | [\[Read\]](#)

Introduced a MoME transformer-based reinforcement learning model for multimodal tasks that combines language and vision, trained on MNIST to link images with textual labels using ResNet18 and GLoVe embeddings.

**Smart Mapping and Prediction Using
Aggregation and Artificial Intelligence
(SMPAAI)** | [\[Read\]](#)

Developed an AI-powered Vacuum Robot with smart mapping for automated and scheduled cleanings, featuring manual control and a bagless dirt disposal system, as detailed in the paper

CERTIFICATES

- IBM Machine Learning Professional Certificate [\[Certificate\]](#)
- Machine Learning Engineering for Production (MLOps) Specialization [\[Certificate\]](#)
- Google Data Analytics Professional Certificate [\[Certificate\]](#)
- Microsoft Exam 768: Developing SQL Data Models [\[Certificate\]](#)
- Microsoft Exam 761: Querying Data with Transact-SQL [\[Certificate\]](#)
- Microsoft Exam 778: Analyzing and Visualizing Data with Power BI [\[Certificate\]](#)
